<sup>†</sup>A hypoallergenic ingredient used to fill space.

### SF743 / 120 Vegetarian Capsules

### EXCIPIENT FREE

This product does not contain wheat, gluten, corn, yeast, soy, egg, dairy products, or artificial colors, sweeteners, or flavors. This product also does not contain lactose, palmitic acid, or magnesium, calcium, or vegetable stearates.

### HOW SUPPLIED

Deproloft® is supplied in bottles of 120 two-piece vegetarian capsules. Packed 12 bottles per case.

### CONTRAINDICATIONS AND WARNINGS

Deproloft is contraindicated in a patient with history of hypersensitivity to any of their ingredients.

Iodine may occasionally cause an allergic reaction in some individuals.

Folinic acid supplementation is not recommended concurrently with methotrexate cancer therapy, as it can interfere with methotrexate's anti-neoplastic activity; however, folinic acid has not been shown to interfere with the anti-inflammatory activity of methotrexate. A patient taking methotrexate for psoriasis, rheumatoid arthritis, or juvenile rheumatoid arthritis can safely take a folate supplement.

### INTERACTIONS

The use of St. John's Wort is contraindicated while taking cyclosporine, digoxin, HIV non-nucleoside reverse transcriptase inhibitors, irinotecan and anticoagulant drugs.

St. John's Wort is a known inducer of cytochrome p450 (3A4) and thus can reduce blood levels of medications that are metabolized via this enzyme.

It is possible that 5-hydroxytryptophan, when taken in combination with a selective serotonin reuptake inhibitor (SSRI) antidepressant such as Paxil®, Prozac®, or Zoloft®, may cause a condition known as serotonin syndrome.

Folinic acid supplementation is not recommended concurrently with methotrexate cancer therapy, as it can interfere with methotrexate's anti-neoplastic activity.

### PREGNANCY WARNING

A woman who is pregnant, or who might become pregnant, should not use Deproloft. Deproloft is specifically contraindicated during pregnancy.

Some women may reduce their risk of having a child with birth defects of the brain and spinal cord by maintaining an adequate intake of folate during their childbearing years.
